

Hello, I'm Tomas Cozens

Machine Learning & AI Engineer

AI applications aren't just my field of study they are a personal hobby that I hope we can all adopt into our lives - I love exploring and experimenting with new imaginative open-source tools and technologies. Having been immersed in the world of computers for most of my life, I combine my technical background with a genuine enthusiasm for artificial intelligence and its possibilities.

Experience

NEXTBASE

Sep 2021 — Nov 2023 (2 years)

I worked as a QA Specialist for NEXTBASE, a company that provides products for the automotive industry. My role involved designing and implementing test plans, and performed rigorous tests of software. I experienced the full software development lifecycle, from design to deployment, and I was responsible testing alongside developers and other teams. It was during this role that I deepened my interest in AI and Machine Learning.

Education

Cardiff University

Sep 2019 – June 2021 (3 years)

Bachelors (BSc) Software Engineering

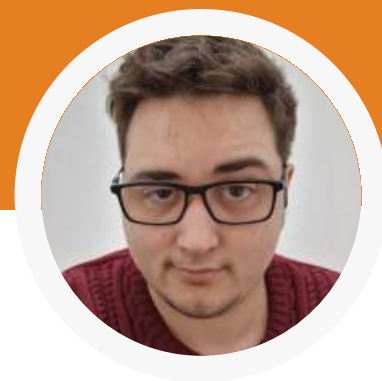

I worked in agile teams to deliver projects for local businesses and companies such as PERI, Admiral and I was able to apply my knowledge to the real-world problems. The experience I gained during this time was invaluable, improving my skills in software development.

University of South Wales

Feb 2024 — Sep 2025 (Currently Enrolled)

Masters (MSc) in Machine Learning and AI

I am currently studying this field , and I am excited to be learning from world-class researchers and academics.

Contact

Date of birth: Dec 10, 1999

Address: GB, Wales

Phone: +44 7940279564

Skills

- Python 3.5/5
- Data Engineering 3.5/5
- Teamwork 5/5
- Design Tools (Figma) 2.5/5
- Deployment 2.5/5

Specilizing

What can I do?

Java Applications

Python Applications

Machine Learning & AI Applications

Web Applications (React,

Javascript)
